AutoCAD [Win/Mac] [Updated-2022]

Go to the OpenCad File menu and select Open from the menu and navigate to the bin folder in the installation path. Open the file HKEY_LOCAL_MACHINE\SOFTWARE\Autodesk\AutoCAD\Setup\dummy\1.INI in Notepad, look for the DIIPath setting and append it to the installation path of Autodesk CAD software. For example, if the installation path is C:\Program Files\Autodesk\AutoCAD, open the file and find the DIIPath value. In the Windows registry editor, go to HKEY_LOCAL_MACHINE\SOFTWARE\Autodesk\AutoCAD\Setup\dummy and add a new string value called DIIPath and assign the DIIPath value that you just modified in the step above. Delete the DIIPath value under HKEY_LOCAL_MACHINE\SOFTWARE\Autodesk\AutoCAD\Setup\dummy. Close Notepad and restart your computer. When you launch AutoCAD, follow the instructions in the Help menu. Use the Autocad Config file to adjust your AutoCAD preference settings and save them in a file called AutoCAD.INI in your installation path. If you cannot find it, it is usually located in the Autocad folder under the AutoCAD installation folder. Using the XML add-in configuration file After you install the Microsoft XML Paper Specification (XPS) Add-in (from the Autodesk Add-ins website), you can use the application to configure your file and create a new file.
