Is there any way to log that error? A: This is caused by an API call that only works when the machine runs under Windows. Either port it to a non-windows machine or rename the API call. search_alarms=1&any_option=value&application=%2&any_option=value&any_option=value&all_processors=1&all_positions=1&any_option=value&all_time=1&any_option=value&application_id=%2&application_id=%2&any_option=value&applicati
